info@glas-schmitz.de

Moderne Innenraumgestaltung ist heute geprägt von individuellen Designs und außergewöhnlichen Ideen.

Dabei finden sandgestrahlte Glasscheiben in der modernen Architektur Anwendung bei Standard-Lichttörausschnitten, Ganzglastüren- und Ganzglasanlagen, Glasduschen und Spiegeln, aber auch bei Isolierglaseinheiten für Fenster und Haustüren.

Bei der Sandstrahltechnik wird spezielles Strahlgut mit hohem Druck auf das Glas „geschleudert“, um unterschiedliche Strukturen und Motive auf die Oberfläche zu bringen. Insbesondere Glastüren verleiht die Sandstrahlung eine dezente Eleganz und reizvolle Nuancen, denn durch die unterschiedliche Lichtdurchlässigkeit des Glases wird das Dekor zum stilvollen Blickfang des Raumes, welcher dadurch immer wieder ein bißchen anders wirkt.

Die Sandstrahlung ist flächig in gleichmäßiger Mattierung und /oder unterschiedlichen Sandstrahltiefen möglich, je nachdem, welche Blickdichte Sie wünschen.

Zusätzlich erleichtert unsere Dia-Protect Beschichtung das Reinigen der gesandstrahlten Oberflächen. Diese optionale Beschichtung garantiert einen wirksamen Schutz gegenüber äußeren Einflüssen und minimiert Fingerabdrücke und unbeabsichtigte Verschmutzungen und trägt somit zur leichteren Reinigung des Glases bei.

Wir bieten Ihnen ein sehr umfangreiches Motiv-Sortiment zur Ideenfindung an, für jeden Geschmack etwas.

Natürlich können auch Ihre individuellen Designs und Dekore realisiert werden. Ebenso können Logos, Schriftzüge und Namen direkt und dauerhaft auf das Glas aufgebracht werden.

Bei fast jedem Motiv können Sie zwischen einer Klarglas-Variante (Positiv-Druck) oder Matt-Variante (Negativ-Druck) wählen. Selbstverständlich ist auch eine Druckkombination beider Varianten möglich.

Gerne passen wir auf Kundenwunsch das Motiv an und setzen Ihre eigene Ideen um. So kann aus einer Standardtür ein kleines Kunstwerk und ein Unikat werden,

Zur Auswahl stehen fertige Motive aus den verschiedenen Bereichen:

Straight Lines / Square Shapes / Curved Lines / Vertical Designs / Imaginative Designs / Pictogram Designs / Letter Designs / Flora Designs / Two Stage Designs / Duo Designs / Art Designs

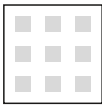

Ihre Vorteile bei einer Sandstrahlung sind:

- die hochwertige Veredelung des Glases
- die Vielzahl an vorhandenen Motiven
- der Einsatz in nahezu allen Interieurbereichen
- die vielfältigen und nahezu unbegrenzten gestalterischen Möglichkeiten
- die Umsetzung individueller Designs oder Ihrer Motiv-Vorschläge
- die Kombination aus unterschiedlichen Motiven
- der 3D-Effekt durch Tiefenstrahlungen
- die kostenlosen Entwürfe nach Ihren Vorgaben
- die Skalierung resp. Anpassung der Motive auf die erforderliche Glasabmessung

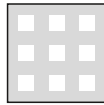

Technische Daten Sandstrahlung

Scheibenmaß max. in mm	3450 x 2800 * / **
Scheibenmaß min. in mm	100 x 100
Scheibengewicht max. in kg	150
Glasdicke max. in mm	60
Mögliche Glasarten	Float, Spiegel, ESG, TVG, VSG/Float - VSG/ESG - VSG/TVG ***
Abstufungen Sandstrahlung	2,0 bar / 2,2 bar / 2,4 bar / 3,0 bar (Standard)

Beispiel

positive Sandstrahlung

negative Sandstrahlung

Legende

- * die Gläser können bis zu einer Glashöhe von 2.100 mm gestrahlt werden
- ** Gläser bis zu einer Höhe von 1.400 mm können bis Breite max. 4.000 mm ausgeführt werden
- *** aus technischen Gründen kann die Sandstrahlung bei VSG-Gläsern nicht zum Folienverbund positioniert werden

Bitte beachten Sie, dass wir die Gläser nur bis zu einer Abmessung max 1.100 x 4.000 mm folienverpacken können.

Motiv Übersicht

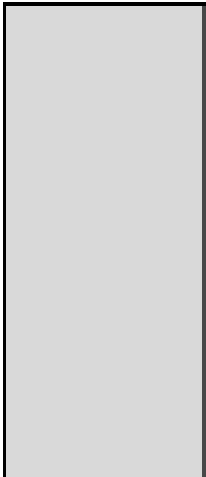

• Straight Lines	Seite	4 - 6
• Square Shapes	Seite	7 - 8
• Curved Lines	Seite	9 - 10
• Vertical Designs	Seite	11 - 12
• Imaginative Designs	Seite	13 - 15
• Pictogram Designs	Seite	16
• Letter Designs	Seite	17
• Flora Designs	Seite	18
• TwoStage Designs	Seite	19
• Duo Designs	Seite	19
• Art Designs	Seite	20 - 23
